Skills

- Full-Stack Development
- Version Control / Git
- Database Management
- Problem Solving & Debugging
- Server-Side Technologies
- Sprint Planning

Experience

Software Developer
Charter Telecom   **May 2024 - Sep 2025**

- Developed full-stack applications using Quasar/Vue frontend and Express/Node.js backend, building reusable components and scalable APIs.
- Integrated with a variety of Cisco APIs (Webex Contact Center GraphQL, RoomOS, and related services) as well as Microsoft Graph, delivering real-time dashboards, device automation, and collaboration tools.
- Managed cloud-based application infrastructure in AWS ECS, including containerized task execution, environment management, and deployment troubleshooting.

Full Stack Developer
Three Trees Technical   **May 2023 - Aug 2023**

- Performed analysis, design, coding, testing, implementation.
- Developed and maintained web applications using the MEAN stack, comprising MongoDB, Express.js, Angular, and Node.js, to create responsive and efficient solutions.
- Worked effectively within Agile software development life cycle, including sprint planning, sprints, and sprint review.

Freelance Web Developer
robertomaiglerroofing.ca   **Dec 2022 - Jan 2023**

- Designed and implemented a dynamic, user-friendly website from scratch using JavaScript and React, demonstrating knowledge in front-end and back-end development, including responsive design and cross-browser compatibility.
- Created custom React components and implemented state management to ensure seamless user interactions.
- Improved website performance by optimizing code, reducing load times, and implementing best practices for web development.

Education

Information & Computer Systems Technology (Diploma)   Sep 2021 - Sep 2023
Camosun College, Victoria, British Columbia
